PROJECTS

Cardiovascular Diseases Risk Prediction

<https://github.com/ronak8180/ML-Project>

- Built a machine learning model to predict cardiovascular disease risk with **94% accuracy**.
- Utilized **Python, Pandas, NumPy, and Scikit-learn** for data analysis, preprocessing, and model development.
- Conducted **EDA, feature engineering, and data cleaning** to improve model performance.
- Applied and compared **classification algorithms**, selected the best-performing model.

Credit Card Fraud Detection

<https://github.com/ronak8180/ML-Project>

- Built an **Artificial Neural Network (ANN)** model using **TensorFlow & Keras**, achieving **98% accuracy** in detecting fraudulent transactions.
 - Conducted **Exploratory Data Analysis (EDA)** and **data preprocessing** with **Pandas & NumPy**, including feature scaling and handling class imbalance.
 - Implemented **training/testing pipelines** and visualized performance metrics using **Matplotlib** for effective model evaluation.
